

Md Fareeduddin

Python Developer | Custom Software Engineer | Full-Stack Developer

mdfareedcbr@gmail.com | +91-8951446221 | my Portfolio

CAREER OBJECTIVE

Motivated Computer Science graduate with hands-on experience in Python development, backend engineering, and full-stack web applications. Skilled in designing, coding, debugging, and enhancing scalable software solutions using Python, Flask, MySQL, and REST APIs. Familiar with agile development practices, version control systems, and software development principles. Strong understanding of object-oriented programming, problem-solving, and writing clean, maintainable code. Seeking a Custom Software Engineer role to contribute to high-performing software solutions and continuously improve technical expertise.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript, Bash
- **Frameworks & Backend:** Flask, Node.js, Express.js, Spring Boot (Basic)
- **Frontend:** HTML, CSS, JavaScript, Responsive Web Design
- **Databases:** MySQL, MongoDB, PostgreSQL (Basic)
- **Tools & Platforms:** Git, GitHub, Postman, VS Code
- **Software Development Concepts:** Object-Oriented Programming (OOP), REST APIs, CRUD Operations, Authentication, MVC Architecture, Agile Development, Version Control, Debugging & Troubleshooting
- **AI / Libraries:** OpenCV, TensorFlow/Keras (Basic), NumPy
- **Operating Systems:** Windows, Linux (Basic)

PROJECTS

Online Assignment Management System – Python Flask, MySQL Dec 2024 – May 2025

- Developed a full-stack software application using Python Flask for assignment management between students and faculty.
- Designed and implemented REST APIs, authentication modules, assignment uploads, submission tracking, and deadline management features.
- Integrated MySQL database for efficient storage and retrieval of users, assignments, and submission records.
- Applied object-oriented programming principles and backend development best practices to build maintainable and scalable components.
- Performed debugging, testing, and troubleshooting to improve application reliability and performance.
- Used Git and GitHub for version control, collaboration, and code management.

Hand Gesture Recognition using Deep Learning

Apr 2025 – May 2025

- Developed a Python-based gesture recognition system using OpenCV and deep learning concepts.

- Processed webcam input data and implemented image preprocessing workflows for improved prediction accuracy.
- Worked on CNN-based model training, classification, and prediction workflows.
- Enhanced debugging and dataset handling processes to improve software reliability and maintainability.
- Gained practical exposure to AI workflows, software problem-solving, and model integration techniques.

Real-Time Document Collaboration Tool – MERN Stack

Dec 2024 – Mar 2025

- Developed a real-time collaborative web application using MongoDB, Express.js, React.js, and Node.js.
- Designed backend APIs and implemented WebSocket-based real-time communication features.
- Collaborated on scalable application architecture and frontend-backend integration.
- Participated in debugging, testing, and feature enhancement activities to improve software quality.

INTERNSHIP EXPERIENCE

App Development Intern – MedHub Connect Pvt. Ltd.

Jul 2025 – Oct 2025

- Contributed to application development and feature enhancement activities in an agile team environment.
- Assisted in debugging and troubleshooting software issues to improve application functionality.
- Collaborated with cross-functional teams to support software development tasks and feature implementation.
- Participated in software testing and maintenance activities to ensure reliability and performance.

Full Stack Developer Intern – Tamizhan Skills

Jun 2025 – Jul 2025

- Worked on web application development using Node.js, Express.js, MongoDB, HTML, CSS, and JavaScript.
- Developed CRUD functionalities and supported backend integration tasks.
- Used GitHub workflows and version control practices for code collaboration and project management.
- Assisted in feature integration, testing, and debugging activities.

AI Foundations Intern – Microsoft Initiative (Edunet Foundation)

Apr 2025 – May 2025

- Completed internship focused on Artificial Intelligence and Python-based software development concepts.
- Worked on a deep learning gesture recognition project involving preprocessing, model training, and prediction workflows.
- Improved understanding of software problem-solving, debugging, and AI application development practices.

CERTIFICATIONS

- Building Modern Web Applications with MERN Stack – Edunet Foundation, EY GDS, AICTE
- AI Foundations Internship – Microsoft Initiative, Edunet Foundation, AICTE

EDUCATION

Qualification	Year	University/Board	Percentage
BSc – Computer Science	2025	Central University of Karnataka	60.51%
Higher Secondary (10+2)	2022	Karnataka PU Board	72.67%
SSLC	2020	Karnataka State Board	69.76%

STRENGTHS

- Strong proficiency in Python programming and backend development
- Good understanding of object-oriented programming and software development principles
- Familiar with agile methodologies and collaborative development workflows
- Skilled in debugging, troubleshooting, and writing clean, maintainable code
- Experience using Git and GitHub for version control and code management
- Quick learner with strong analytical and problem-solving abilities
